OBSERVAÇÕES

Este Departamento publica duas séries de boletins referentes ao commercio exterior do Brasil. A primeira compõe-se dos boletins resumos que apparecem no fim de cada anno, com os algarismos do nosso commercio exterior. Nessas publicações figuram: as quantidades e os valores das mercadorias importadas e exportadas, sem a discriminação de onde procedem nem para onde se destinam; os valores totaes da exportação e importação de cada paiz e de cada porto brasileiro. A segunda série é dos boletins geraes em que se especificam, para cada mercadoria importada, o paiz de procedencia e o porto brasileiro de destino e, na exportação, o paiz comprador de nossas mercadorias e o porto brasileiro de embarque.

IMPORTAÇÃO

Esta designação comprehende exclusivamente as mercadorias de origem estrangeira introduzidas para consumo no Brasil.

As mercadorias discriminadas nos quadros ou tabellas correspondem á importação geral, que abrange tanto as mercadorias já dadas ao consumo, como as que se acham nas alfandegas para esse fim ou para serem reexportadas. — As mercadorias em transito não estão ahi incluidas.

As quantidades, es valores, as procedencias e os destinos das mercadorias são os declarados nas facturas consulares, pelas quaes é organisada a estatistica da importação no Brasil.

Quantidade. — As quantidades, cuja unidade for kilo, representam o peso liquido real das mercadorias separadas de seus envoltorios, tanto externos como internos.

Valor. — O valor das mercadorias compõe-se de:

- 1º, custo da mercadoria no paiz de procedencia;
- 2°, frete e despesas até o porto brasileiro de destino;
- $3\,^{\circ}$, valor livre a bordo até o porto de destino, isto é Cif, que é a somma dos dois anteriores.

É, portanto, exclusive direitos aduaneiros ou quaesquer gastos ulteriores á entrada das mercadorias nas alfandegas brasileiras.

A separação do custo tem por fim facilitar a comparação dos valores da nossa estatistica de importação com os da exportação de outros paizes para o Brasil.

Os valores expressos em milréis, papel, representam as differentes moedas estrangeiras, declaradas nas facturas consulares, reduzidas segundo a taxa média mensal do cambio á vista, de accordo com os dados fornecidos pela Camara Syndical dos Corretores de Fundos Publicos, da praça do Rio de Janeiro.

Os valores expressos em libras esterlinas representam a nossa moeda papel convertida segundo a taxa média cambial de cada mez.

Deprehende-se destas explicações que o chamado valor official, —designação commumente dada, pelas Alfandegas, aos valores convencionaes fixos, attribuidos ao custo das mercadorias importadas, —

em cousa alguma interfere no calculo dos valores, consignados nesta estatistica, os quaes são, tanto quanto em estatistica é possivel conseguir, puramente commerciaes.

Origem ou procedencia das mercadorias.

Até 1917, inclusive, apurava-se a estatistica de importação, pelos paizes de origem das mercadorias, embora fossem adquiridas em local diverso do de sua producção.

As mercadorias,* por exemplo, originarias da India, por nós adquiridas em Hamburgo, figuravam como importadas dessa colonia ingleza e não da Allemanha.

Ora, sendo a estatistica commercial uma estatistica de trocas internacionaes, onde se consignam as relações de compra e venda entre paizes, e não uma estatistica de producção, modificou-se em 1918 o criterio até então seguido, figurando dessa data em diante, em vez do paiz de origem, o de venda ou de procedencia. Desde que uma mercadoria é adquirida por nós em determinado paiz e dahi expedida para o Brasil quer directamente, quer em transito por outro ou outros paizes, é o paiz de acquisição que figura em nossa estatistica.

Assim, a mercadoria adquirida na Suissa, pelo negociante no Brasil, e vinda até Bordéos, onde é para aqui embarcada e onde é a factura consular legalisada, figura na nossa estatistica como importada da Suissa. Se, porém, for originaria da Suissa, mas comprada em França, é este ultimo paiz que apparece na nossa importação.

Destino das mercadorias.—O destino das mercadorias é a estação aduancira indicada na factura consular, para onde são as mesmas consignadas. Esta estatistica não póde discriminar o verdadeiro movimento por Estado e sim, apenas, a quantidade e valor das mercadorias importadas nos portos de cada Estado, seja para seu proprio consumo, ou seja em transito para outro Estado. Assim, por exemplo, grande parte das mercadorias importadas pelo porto do Rio de Janeiro se destinam ao consumo dos Estados de Minas Geraes, Goyaz e Rio de Janeiro, assim como mercadorias importadas pelo porto de Recife se destinam ao consumo dos Estados de Alagôas, Sergipe, etc: facto que tambem se dá, em menor escala, em outros Estados da União.

EXPORTAÇÃO

Os algarismos destas tabellas representam todas as mercadorias de producção nacional, exportadas para paizes estrangeiros.

As quantidades são obtidas pelas declarações feitas nos manifestos dos navios que sahem de portos brasileiros para o exterior da Republica ou pelas guias de exportação, quando esta é feita por via terrestre.

Valor.—Os valores são calculados segundo os preços correntes das mercadorias em cada praça exportadora, accrescidos das despezas de carreto, acondicionamento, direitos estadoas, etc., o que

vem a representar o valor da mercadoria posta á bordo no Brasil, isto é, Fob. Na sua totalidade, esses valores exprimem, com a possivel approximação, o que despendeu o estrangeiro para adquirir a mercadoria do Brasil.

Procedencia das mercadorias. — A procedencia, na exportação, representa o porto brasileiro onde a mercadoria embarca para o exterior. Portanto, no quadro da exportação por Estados e seus respepectivos portos, os valores, que ahi figuram, não representam defacto os valores da producção exportavel de cada um delles, mas sim o que, pelo mencionado porto, sahiu com destino ao exterior.

É assim que na exportação dos portos de Manãos e Pará figura toda exportação do Territorio Federal, como tambem parte da de Matto Grosso.

A exportação de productos do Piauhy, cujos portos não figuram neste boletim, faz-se pela Ilha do Cajueiro, — que está sob a juris lição do Maranhão, — e pelo porto da Bahia. Por este ultimo porto sahe, principalmente, a borracha maniçoba cultivada na zona limitrophe. Por Pernambuco e Bahia sahem muitas mercadorias originarias dos Estados que com elles confinam.

Pelo porto do Rio é feita a exportação dos Estados do Rio, Minas, Goyaz, parte da do Espirito Santo e a de alguns productos do norte de São Paulo.

Destino das mercadorias. — O destino das mercadorias da exportação é o declarado nos manifestos, mas nem sempre é esse o destino definitivo das mercadorias. Faltam, entretanto, elementos que permittam determinar com segurança, nesta estatistica, esse destino ulterior.

Não tendo o Brasil linhas directas de navegação para todos os paizes, acontece que muitos paizes deixam de figurar como importadores de nossos productos, emquanto que figuram indevidamente, outros com quantidades maiores ás que realmente importam.

Constam, como importados pelo Uruguay, mercadorias sahidas de Matto Grosso e Rio Grande do Sul e que são transbordadas em Montevidéo para a Europa e Estados Unidos. Sendo o porto de Montevidéo o ultimo em que escalam os navios procedentes de Corumbá, é aquelle destino que vem nos manifestos procedenctes de Matto Grosso.

VALOR DA MOEDA BRASILEIRA

A moeda, em que são expressos os valores da exportação e importação neste boletim, é o milréis papel (1\$) e o seu multiplo o conto de réis (1:000\$), moeda corrente no Brasil.

Nos totaes geraes, quer os de mercadorias, quer os dos paizes e portos de destino e procedencia, os valores em moeda papel são acompanhados de scu equivalente em libras esterlinas, moeda corrente na Inglaterra.

O valor do milréis papel varia com o curso do cambio.

Encontra-se, no quadro que se segue, o valor approximado do milréis e do conto de réis, papel, em libra esterlina, em dollars americanos e em francos francezes, de modo a facilitar a conversão da moeda brasileira a essas moedas.

EXPLANATORY NOTES

This Department issues two series of bulletins. The first series comprises the bulletins which appear at the end of each year, showing figures of our foreign trade. This publication mentions the quantities and values of imported and exported goods, without any indication of their origin or destination; the total values of imports and exports of each country and of each Brazilian port. The second series comprises general bulletins where, for each imported article, a mention is made of the origin and the Brazilian port of destination, and, for exported goods, the importing country and the Brazilian port where goods are shipped.

IMPORTS

Under this heading is comprised all merchandise of exclusively foreign origin that enter Brazilian ports whether for consumption in the country or for re-export.

The statistics that figure under the heading «Imports» correspond to the General Trade of the country and comprise not only merchandise already cleared for consumption, but also merchandise stored in Custom Houses, with exception of that landed at Brazilian ports in transit for other countries.

The figures relating to quantity, value, origin and destination are derived from the declarations contained in Consular Invoices, the basis for elaborating the statistics of Imports.

Quantity. — As regards Imports, quantities represent the net weight of the goods, exclusive of wrappers or cases of any description, internal or external.

Values. — The values of Imports declared in the Consular Invoices embrace two factors; 1st: prime cost of goods put on the quays or at the frontier of the exporting country: 2nd; freight and expenses, inclusive of insurance, from the aforementioned point to delivery on board at a Brazilian port; the two together representing the C. I. F. value of Imports in Brazil.

The C. I. F. value, of course, does not include any taxes or customs duties payable posterior to arrival of the goods at a Brazilian port

The object of specifying cost separately from C. I. F. values is to afford accurate means of comparison of Brazilian statistics of Imports with the statistics of the Exports of the respective country for the same goods.

Both cost and C. I. F. value are stated in Consular Invoices in terms of the money current at the respective port of shipment, and for statistical purposes, are converted to paper milréis.

Owing to frequent wide differences of exchanges, the C. I. F. value of Imports is tabulated in these statistics in milréis eurrency and in pounds sterling.

The values expressed in pounds sterling are given by the conversion of our paper currency calculated by the medium of exchange rates for each month.

Official value.—The C. I. F. valuations of Imports followed in these statistics must not be confused with what is known in Brazil as the «official value» appraised on goods cleared at the Customs on a schedule of values.

Origin of goods.—The countries mentioned for our Imports up to 1917 were the ones that had produced or manufactured the goods, without making any reference to the exporting country. Thus, Rice bought in Hamburg but from Indian origin, was classified as imported from British India, instead of Germany. As, however, commercial statistics are intended to show the international exchange of purchases and sales, and not the production of goods, we have changed our former method, prior to 1918, and are now specifying the country which sells the goods, without making any reference whatever to the producing country.

When a merchandise is bought by us in a particular country and thence shipped to Brazil, either directly or through any other country, the selling country is the one to be mentioned in our Imports. In this manner, goods bought in Switzerland by a merchant in Brazil and sent to Bordeaux, where the Consular Invoice is authenticated and whence they are shipped to Brazil, are entered in our statistics as imported from Switzerland. If, however, their origin is Switzerland but purehased in France, this is the country which will appear in our Imports.

Destination of Imports.—By destination is meant the Brazilian port or the frontier customs station to which merchandise is consigned. The destination, therefore, represents the port or point of arrival of goods, but does not take into account any ulterior destination to which the goods may be afterwards forwarded and, consequently, does not serve to discriminate the movement of Imports per State.

Merchandise, for example, cleared at the Custom House of Rio de Janeiro is classified under the heading of Rio de Janeiro, though it may be intended for consumption in the States of Minas Geraes, Espirito Santo or Goyaz. In the same way, merchandise landed at Pernambuco is classified under the heading Pernambuco, though invoiced, perhaps, for consumption in the States of Alagoas or Rio Grande do Norte.

As several of the States are mediterranean, or do not possess ports suited for ocean born traffic, such as Minas Geraes and Goyaz, they do not figure at all in these statistics, the Imports intended for their consumption being classified under the respective port of arrival.

EXPORTS

The statistics shown under this heading represent all merchandise produced in this country and shipped therefrom to foreign countries. The quantities of Exports are derived from the declarations contained in the manifests of steamers cleared from brazilian ports to foreign countries, or by the Bills of Lading when exports are made overland.

Origin of goods.—The origins of exports are the Brazilian ports where the goods are shipped to foreign countries. The values, shown on the table of exports by States and their respective ports, do not represent, in fact, the values of production exportable by each of them, they only designate the goods shipped by those ports to foreign countries.

In this manner, the figures of exports from the Federal Territory are included with those of Manáos and Pará, as also a portion of that from Matto Grosso.

Destination of Exports.—The destination of exports is that specified in the manifests of ocean going vessels, cleared at Brazilian ports, whether direct or «for orders». In the latter case, the ultimate destination not being ascertainable, the ports of call: Falmouth, etc. are regarded as the destination.

For this reason, the totals given by these statistics for exports to certain countries, at ports of which vessels are accustomed to call for worders, will frequently not coincide with those of the exports to Brazil from the country specified.

The value of exports.—The value of exports is F. O. B. at the respective Brazilian port of clearance in Brazil, appraised in accordance with the prices current at such port on the weights or quantities, gross or net as the case may be, of the merchandise declared in the respective manifest, plus the cost of cartage, packing and loading charges and the export duties collected at the port of shipment.

The values of exports are scheduled in these statistics, in the same manner as the imports values, i. e. in milréis currency and in pounds sterling.

Freight and insurance which are generaly paid abroad, are not included.

For comparison of the value of Exports F. O. B. in Brazil, with that of Imports of any particular foreign country, an allowance must, of course be made for freight, insurance and landing charges, that will vary according to the destination.

VALUE OF BRAZILIAN CURRENCY

The currency in which we give the values of Exports and Imports in this bulletin, is the paper milréis (1\$) and its multiple, the conto de réis (1:000\$), the legal currency in Brazil.

In the general totals per merchandise and per country and ports, either of origin or destination, the values are stated in paper currency and the equivalent in pounds sterling.

The value of the paper milréis is subject to the variation of the rate of exchange.

The following table shows the approximate value of the paper milréis and the conto de réis in pounds sterling, in American dollars and in French francs, in order to facilitate the conversion of the Brazilian currency to any of the latter ones.

YEARLY AVERAGE VALUE OF PAPER MILRÉIS AND CONTO DE RÉIS

Léo de Affonseca Director geral

OBSERVATIONS

Notre statistique commerciale publie deux séries de bulletins. La première est composée des bulletins résumés, publiés annuelment avec les chiffres de notre commerce exterieur. Dans ces publications figurent les quantités et valeurs des marchandises impertées et exportées, sans l'indication de leur provenance ni destination; les valeurs totales de l'importation et de l'exportation de chaque pays et port brésilien. La seconde série est celle des bulletins généraux où sont spécifiés, pour chaque marchandise importée, le pays de provenance et le port brésilien de destination, et pour l'exportation, le pays acheteur et le port brésilien d'embarquement.

IMPORTATION

Cette désignation comprend exclusivement les marchandises d'origine étrangère introduites au Brésil pour la consommation.

Les marchandises, désignées dans les listes ou les tables, correspondent à l'importation générale, qui comprend aussi bien les marchandises déjà livrées à la consommation, que celles ayant la même destination, en dépôt dans les douanes, et celles qui sont à réxporter. Les marchandises en transit n'y figurent pas.

Les quantités, les valeurs, les provenances et les destinations des marchandises sont celles déclarées dans les factures consulaires, qui sont la base de la statistique de l'importation.

Quantité. — Les quantités, dont l'unité de mesure est le kilogr., expriment le poids net réel des marchandises, séparées de leurs emballages, tant extérieurs qu'intérieurs.

Valeurs. — Les valeurs des marchandises résultent de l'addition:

- 1°, du prix de la marchandise dans son pays d'origine;
- 2°, du prix de transport jusqu'au port brésilien de destination;
- 3°, de sa valeur à bord jusqu'au port de destination, laquelle est le total des prix précédents.

N'y sont donc pas comptés les droits des douanes ni les frais ultérieurs.

La décomposition du prix a pour but de faciliter la comparaison des valeurs de notre statistique d'importation avec celles de l'exportation des autres pays au Brésil.

Les valeurs exprimées em milréis, papier, représentent les différentes monnaies étrangères déclarées dans les factures eonsulaires, réduites suivant le taux moyen mensuel du change à vue, conformément aux données fournies par la Chambre Syndicale des Courtiers en Fonds Publics, de la place de Rio de Janeiro.

Les valeurs exprimées en livres sterling representent le milréis, papier, reduit selon le taux moyen mensuel du change à vue sur Londres.

Il résulte de ces explications que, ce qu'on appelle la valeur officielle — désignation communément donnée aux valeurs conventionnelles, fixes, attribuées par les douanes au coût des marchandises importées— n'intervient pas dans le calcul des valeurs consignées dans cette statistique, lesquelles sont, autant qu'il est possible d'obtenir en statistique, purement commerciales.

Origine et provenance des marchandises.

Jusqu'au 1918, exclusivement, l'importation répresentait les pays producteurs ou fabricants des marchandises quels que fussent ceux qui nous les avaient vendues ou exportées au Brésil. La statistique commerciale n'étant pas une statistique de production, mais bien d'échanges internationaux, à partir de 1918, les pays qui figurent à l'importation sont ceux où la marchandise a été expediée en destination du Brésil, soit directement, soit en traversant d'autres pays, même avec changement de moyens de transport dans ces pays.

Ainsi, les marchandises achetées en Suisse et expediées de Berne au Brésil, voie Bordeaux, figurent à la statistique comme provenantes de la Suisse.

Toutefois, la marchandise originaire de la Suisse, étant acquise en France, e'est ce dernier pays qui figure, maintenant, dans notre importation.

Destination des marchandises. — La destination des marchandises est la station douanière, indiquée dans la facture consulaire, pour laquelle elles sont consignées. Cette statistique ne peut pas indiquer le véritable mouvement par Etat, tout au plus la quantité et valeur des marchandises importées dans les ports de chaque Etat que ce soit pour sa propre consommation ou en transit pour un autre Etat. Ainsi, par exemple, une grande partie des marchandises importées par le port de Rio de Janeiro sont destinées à la consommation des Etats de Minas Geraes, de Goyaz et de Rio de Janeiro; de même, les marchandises importées par le port de Recife sont destinées à la consommation des Etats d'Alagoas, de Sergipe, etc., fait qui se reproduit, cependant, sur une moindre échelle pour d'autres Etats du Brésil.

EXPORTATION

Les chiffres de ces tableaux représentent toutes les marchandises de production nationale exportées dans les pays étrangers.

Les quantités sont fournies par les déclarations faites dans les certificats de chargement des navires, qui sortent de ports brésiliens pour l'exterieur de la République, ou par les lettres de voiture, ou récépissés d'exportation, quand elle est effectuée par voie terrestre.

Valeurs. — Les valeurs sont calculées d'après les prix courants des marchandises, sur chaque place d'exportation, augmentés des frais de charroi, de conditionnement, des droits à payer à l'Etat, etc., ce qui représent la valeur de la marchandise mise à bord au Brésil.

Dans leur totalité, ces valeurs expriment, aussi approximativement que possible, ce que l'etranger a payé pour entrer en possession de la marchandise.

Provenance des marchandises. — La provenance dans l'exportation représent le port brésilien où la marchandise s'émbarque pour

l'extérieur. Donc, dans le tableau de l'exportation, par Etats et leurs ports respectifs, les valeurs qui y figurent ne représentent pas, de fait, les valeurs de la production exportable de chaeun d'eux, mais seulement celle qui est sortie par le port mentionné à destination de l'extérieur.

C'est ainsi que, dans l'exportation des ports de Manáos et de Pará, figure toute l'exportation du Territoire Fédéral et d'une partie de celui de Matto Grosso.

L'exportation des produits du Piauhy, dont les ports ne figurent pas dans cette liste, se fait par Ilha do Cajueiro—qui se trouve sur le territoire du Maranhão— et par le port de Bahia. Par Pernambuco et Bahia, sortent beaucoup de marchandises originaires des Etats auxquels ils confinent.

Par le port de Rio se fait l'exportation des Etats de Rio, Minas, Goyaz, d'une partie de celui d'Espirito Santo et de quelques produit: du nord de São Paulo.

Destination des marchandises. — La destination des marchandises exportées est celle qui est déclarée dans les certificats de chargement, mais ce n'est pas toujours celle-là qui est la définitive.

Nous manquons encore des éléments nécessaires pour indiquer avec assurance, dans cette statistique, cette destination ultérieure.

Le Brésil, n'ayant pas de lignes directes de navigation pour tous les pays, il en résulte que beaucoup de pays ne figurent pas comme importateurs de nos produits, pendant que d'autres figurent, indubitablement, pour des quantités supérieures à eelles qu'ils importent réellement.

On classe comme importées par l'Uruguay des marchandises venues du Rio Grande do Sul et du Matto Grosso, et qui sont transbordées à Montevidéo, pour être envoyées en Europe et aux Etats-Unis, car Montevidéo est le dernier port où font escale les navires venant de Corumbá. C'est à cette destination qu'ils vont, d'après les certificats de chargement venant de Matto Grosso.

VALEUR DE LA MONNAIE BRÉSILIENNE

La monnaie qui exprime les valeurs de l'exportation et importation dans ce bulletin, est le milréis (1\$), papier, et le conto de réis (1:000\$), monnaie courant brésilienne. La valeur en or du papier dépend du change ou prime de l'or sur le marché.

Dans les totaux généraux, soit des marchandises, soit des pays et ports de destination et provenance, les valeurs en papier monnaie sont accompagnées de leur équivalent en livres sterling, monnaie anglaise.

On trouve, dans le tableau suivant, la valeur approximative de la monnaie brésilienne (milréis et contos de réis, papier) en livres sterling, dollars américains et français, afin de faciliter la conversion à ces monnaies de la monnaie brésilienne.
